PROFESSIONAL SUMMARY

Computer Engineering undergraduate at International Institute of Information Technology (I2IT), Pune, with an 8.80/10 CGPA and hands-on experience in full-stack development, machine learning. Built and deployed applications using Flask, PostgreSQL, Docker, and Google Gemini APIs through internships, hackathons, and open-source contributions. Strong foundation in software engineering, cloud-native application development, and data-driven problem solving.

EDUCATION

International Institute of Information Technology (I2IT), Pune
B.E. – Computer Engineering | CGPA: 8.80 / 10.0 | 2024–2028
Class XII (HSC) – 81.50 % | Class X (SSC) – 91.60 %

EXPERIENCE

AI & Data Analytics Intern | Edunet Foundation & Shell — AICTE Virtual Internship Program *Jul 2025 – Aug 2025*
- Developed an EV Demand Prediction model using machine learning and real-world datasets.
- Automated data cleaning, visual analytics, and model validation pipelines in Python, reducing preprocessing time by 40%.

Open Source Contributor – AI Agents Track | GirlScript Summer of Code (GSSoC) *May 2026 – Present*
- Orchestrated 12 pull-request merges for AI-agent libraries, improving code quality and documentation.

Web Development Team Member | AWS Cloud Club I2IT *Mar 2026 – Present*
- Collaborated on web development initiatives and cloud-focused technical projects.

PROJECTS

KMRL Document Intelligence & Sharing Platform | Smart India Hackathon (SIH) 2025 | Team Leader & Full-Stack Developer
Technologies: Flask, PostgreSQL, Dropbox API, Google Gemini 1.5 Flash, Tesseract OCR, Docker, Railway, HTML5, Tailwind CSS, Jinja2
- Led development of an AI-powered document intelligence platform for Kochi Metro Rail Limited (KMRL).
- Built a centralized document repository as a single source of truth for organizational document management.
- Integrated Google Gemini 1.5 Flash for bilingual AI-powered summarization in English and Malayalam.
- Implemented OCR-based extraction from scanned PDFs and image documents using Tesseract OCR.
- Developed full-text search across document content, AI summaries, and metadata; designed analytics dashboards and document-sharing workflows.
- Delivered a solution projected to reduce document search and review effort by 90%.

MediPredict – Healthcare Predictive Analytics System
Technologies: Python, Scikit-learn, Flask, MySQL, Power BI, HTML, CSS, JavaScript
- Developed an end-to-end machine learning platform for diabetes risk prediction using patient healthcare data.
- Built and optimized a Logistic Regression model achieving approximately 76% accuracy and 77% recall.
- Developed a Flask-based REST API for real-time predictions, integrated MySQL, and created Power BI dashboards for healthcare analytics.
- Improved model performance through feature scaling, threshold optimization, and data preprocessing.

EV Demand Prediction Using Machine Learning
Technologies: Python, Pandas, NumPy, Jupyter Notebook
- Built predictive models to forecast Electric Vehicle demand using historical datasets.
- Performed data preprocessing, feature engineering, exploratory analysis, and model evaluation.
- Generated actionable insights through visualization and analytical reporting.

TECHNICAL SKILLS

Languages: Java, Python, SQL
Web Development: HTML5, CSS3, JavaScript, Flask, Tailwind CSS
Databases: MySQL
AI/ML: Machine Learning, Scikit-learn, Pandas, NumPy, Tesseract OCR
Tools & Platforms: Git, GitHub, GitHub Copilot, VS Code, Jupyter Notebook, Docker
Cloud & Deployment: Microsoft Azure, Railway
Core Competencies: Full-Stack Development, AI Integration, Data Analysis, Problem Solving

CERTIFICATIONS & LEADERSHIP

- Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft
- GitHub Copilot Certification
- Team Leader, Smart India Hackathon (SIH) 2025
- Open Source Contributor, GirlScript Summer of Code (GSSoC)
- Web Development Team Member, AWS Cloud Club I2IT
